

FOR COLUMBUS, GA SMALL BUSINESS OWNERS

You're working 60 hour weeks. The money still feels like it's gone before it hits the account.

You get a P&L from your accountant. You look at it. You don't fully understand it. So you make the next big call on gut feel, because gut feel is all you have.

Are you against the idea of finally knowing exactly where every dollar in your Columbus business is leaking?

Get a free sample report

How it works →

No commitment. No credit card. Real report on your actual business.

WHY THIS ISN'T ALREADY SOLVED

You've tried the other options. Here's why they aren't working.

Your CPA is a historian.

They tell you what happened last quarter so the IRS is happy. That doesn't help you decide whether to hire another tech tomorrow, or whether to cut your marketing spend today.

02

Raw AI is just a fast calculator.

It doesn't know the Columbus market. It doesn't know that 4 points over the food cost benchmark is the difference between a good year and a closed restaurant. Context is the whole job.

03

QuickBooks shows you everything except the answer.

You can pull a hundred reports and still not know which jobs make money, which line cooks are over portioning, or whether your new stylists are profitable yet. The data's there. The story isn't.

THE HONEST VERSION

It feels like you're **filling a bucket with holes in the bottom**. Another 60 hour week, another payroll covered, another month gone. If you don't find the leaks now, the next six months are the same week on repeat.

WHAT YOU ACTUALLY GET

A 5 minute story in plain English. One specific thing to fix this month.

We don't send 20 page spreadsheets. Every report ends with the One Thing — a single recommendation tied to a specific dollar amount, on the table this month, that you can act on this week.

HUMAN REVIEW

AI assisted, not AI generated. The engine handles the math. A senior analyst who knows the Columbus market reviews the One Thing on every single report before it goes out. That's the difference between \$150 a month and a \$20 ChatGPT subscription.

EVIDENCE

One discovery, one year paid for.

A Columbus restaurant owner read his first report and found a 4 point gap in food cost. He fixed it in two weeks. That single line item paid for the next twelve months of reports.

EVIDENCE

Built for the Chattahoochee Valley.

National tools handle bookings and payroll. They don't know your local labor market, your supplier costs, or what the shop across town is charging. We do. Every benchmark in every report is local.

EVIDENCE

CFO grade analysis. Owner grade language.

The same financial discipline a \$400 an hour consultant uses. Translated into the words you'd use with your spouse over dinner. No jargon. No 30 page deck. Just the answer.

5 min

Average time to read the monthly report. We don't waste yours.

\$1,200+

Median dollar leak we identify in the first report. Eight times the subscription.

48 hrs

Turnaround on your free sample. Real business, real numbers, real recommendations.

PRICING

Less than your power bill. Pays for itself the first month.

At \$150 a month, this isn't a consulting fee. It's a utility — except this one puts money back in your pocket.

Full health check of your business with a scored assessment and ranked action plan. Best for owners in a tight spot right now.

Competitor Report

\$299 one time

Add on for subscribers

See exactly where you stand vs. the shop across town and what to do about it. Local market intelligence.

WHAT OWNERS SAY

From the first batch of reports.

My accountant told me I made money. The report told me which jobs lost money. Two different conversations. I needed the second one.

HVAC owner, Columbus

First report flagged my food cost was 4 points high. Fixed it in two weeks. That one fix paid for a year of reports.

Restaurant owner, Columbus

It's the first time I've actually understood my own numbers. Worth more than what I pay my CPA.

Salon owner, Atlanta

What's the cost of another six months of gut feel?

The bucket keeps leaking until you find the holes. The leaks keep growing until somebody names them.

"How would it affect your business if I built you a real sample report this week — for free — just so you can see the leaks for yourself?"
