

Ai Acceptable Use Policy

Purpose: Establish a practical security baseline

Version: 1.0 | Date: 2026-08-28

Policy

Approved tools/accounts only; human accountability; no secrets; no unlawful deception; no unauthorized likeness/content; no consequential autonomous decisions; verify outputs; report incidents.

Evidence

Record owner, approver, effective date, systems in scope, exceptions, control evidence, incident contact, and next review.

Exception rule

Exceptions require written business reason, risk assessment, compensating controls, expiry date, and accountable approval. Convenience alone is not sufficient.
